Name : BeinTouch App

We have build a user friendly chat application where a user can send messages to other people . So basically in this app a user can chat with anyone who has registered in the app .

Tools Used:

- Android Studio(SDK)
- FireBase(for authentication ,Realtime Database , Cloud Storage)
- Java
- Xml

First Screen : Login/Signup

A user must either register or login into the App

Second Screen : Dashboard

Ajith2

Siva Sai Atchyut

Dattajaideep

AJITH M

Logged in successfully

Third Screen : User can select a contact to chat with and start chatting

Beintouch

Dattajaideep

hi

hi

hi

typehi

hiiii

Fourth Screen : User can upload Profile pictures

Beintouch

Uploading...

Uploaded 0%

UPLOAD PHOTO

LOG OUT

Lastly , the user can Logout from the App.
